

The Federal Communications Commission

Dear The Federal Communications Commission,

What's the matter with you people. The add-on taxes and regulation fees are almost as much now as the \$amount for the phone service itself. Shame on you! Have you no conscience as to what is fair and just.

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

We are senior citizens, retired and do not use our cell phones just for luxury. We use our wireless phones for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair! Get real, People!
Jane Rice

Sincerely,

Jane Rice
